Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The abstract of the disclosure is objected to because it is to be a summary of the technical disclosure and terms such as "invention", which have legal connotations should not appear therein. Correction is required. See MPEP § 608.01(b).

The disclosure is objected to because of the following informalities: There is no Brief Description of the Figures and one is required. Further the reference to claim 1 found in two occurrences on page 1 of the specification is objected to as the claims should find foundation in the specification and not be referred to in the specification.

Appropriate correction is required.

Claim Objections

Claim 2 is objected to because it includes the reference character 11 which are not enclosed within parentheses.

Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 3677

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 2 are written in a conversational manner utilizing vague language such as “on the one hand” (claim 1, line 4), “on the other hand” (claim 1, line 6) and it is not particularly pointed out what this means as the terms appear to be totally unneeded. The term “transverse wall of the opening” (claim 1, line 7) lack antecedent basis as no transverse walls have been defined. The term “it” (claim 1, line 8) is unclear as it can refer to any structure. Applicant utilizes the language “are designed” (claim 1, line 11) and “is designed” (claim 1, line 16) and it is not particularly pointed out what further features are referred to and again it is suggested that the limitations be deleted as being unneeded. The limitations “the connection of the insertion part (3) to the grip tab” (claim 1, lines 12-13); “the latter” (claim 1, line 15) and “which ridge” (claim 1, line 16) lack clear antecedent basis and is unclear in scope and applicant should use conventional descriptive language.

Allowable Subject Matter

Claims 1 and 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents of Schumm (US 3147522; US 3206813; US 3206814), Orenick et al. (US 3086265), Rynk (US 3576054), Bunnell (US 3837047), Kleeman (US 5363536), Sayegh (US 6226839) and Pettersson (US 6594867) teach pertinent fastener structure.
